SUIT Gold King Release Monitoring Stations and Analytes.docx

Hi Adam and Joyel,

In preparation for your meeting, I have attached our SUIT Water Quality Monitoring Animas River Release Response. Our analyte list was developed with EPA to ensure we are collecting data in concert with EPA efforts.

Unfortunately, I cannot attend your meeting in person, but I am very interested in participating via conference call to discuss data collection, analysis and co location of samples with 3<sup>rd</sup> party's (EPA/Other) to validate our results.

Best, Curtis
